講演タイトル

Methods and quantifications in wheelchair sport performance Bruno WATIER Ph.D.

JRL (AIST-CNRS), Tsukuba, Japan LAAS-CNRS, Toulouse, France Université de Toulouse 3, UPS, Toulouse, France

The advent of Paralympic sports, particularly in the context of the Paris Games, naturally raises the question of performance criteria. In wheelchair sports, performance is multifactorial and depends on the athlete-chair combination. It is thus pertinent to consider the adaptation of the wheelchair to each athlete and the methods for evaluating overall performance.
